Draft Document for the Quality and Contaminants Report

Most of this meeting was doing a final edit of our document to present to the larger Task Force.

- We think there is still merit in a larger group discussion of low salt recommendations.
- We have concern about the number of storm drains/outfalls that are all heading toward Sawmill Brook and the Lincoln Street well – not only from the school property, but drains coming from up on School Street.

We discussed the MEPA Environmental Monitor and felt it was important for someone in town to keep an eye on this as the window to comment on proposed projects is short. Jessica will email Greg Federspiel and ask him about this.

Everyone is asked to review the document one more time by Sunday night and forward any edits to Gordon.

There is no next meeting scheduled at this time.

Minutes respectfully submitted by Jessica Lamothe. Minutes approved on March 22, 2023.
