Subject: SLV School Street -Wildlife Corridor/Vernal Pool Analysis and Public Hearing Process

Madam Chair,

Our team from Goddard Consulting has been working rigorously to complete the wildlife corridor/vernal pool analysis. This scope of work, and the work product in general, is obviously of keen interest to multiple parties, so my team is being particularly diligent in their approach to this analysis.

Consequently, we are not going to be able to submit the completed study by close of business today as I had previously represented. I have spoken with our technical team and confirmed we can commit to a full submission on Thursday June 9th.

I know there has been some concern expressed about concluding the public hearing process over the next two public hearings, concluding on June 22nd. As a **show of good faith**, and in an effort to wrap up remaining loose ends and allow the peer reviews and the town adequate time to review soon-to-be-submitted information, I am prepared to extend the public hearing process by 30 days through July 21st. Based on the every other Wednesday schedule the Board has established during this public hearing process, this should allow for two additional public hearings which should allow the necessary additional time to conclude the information review process.

Please let me know if you have any questions.

Respectfully,
Geoff Engler
